Who uses the Cloud and how

IaaS
Infrastructure as a service
In this service, companies access either physical or virtual servers on a pay-as-you-go basis. This allows them to pay for only the server space they use.

Producers
Any online email provider, Google, Facebook, salesforce.com

Producers
Force.com, Google App Engine

Consumers
Anyone who needs to host servers and applications

SaaS
Software as a service
This means pretty much any program that you use online

Consumers
Pretty much everyone who uses the internet

Developer
App and web developers

PaaS
Platform as a service
This describes service that developers use to build custom applications
